

## **KDPH Needs Pharmacist Volunteers**

The Kentucky Department for Public Health is building a volunteer healthcare professional database to call upon, if needed, to assist in the effort to combat COVID-19 in Kentucky. The talents and skills of healthcare professionals including pharmacists, physicians, nurses, respiratory therapists and nursing assistants are needed.

If you are interested in becoming a volunteer, please see the attached letter from Dr. Steven Stack, Commissioner of the Kentucky Department for Public Health. The letter provides information describing scenarios when healthcare volunteers may be needed. ***The letter also contains an online link to register as a volunteer.*** Please use this link to let KDPH know you are willing to volunteer! A letter from Governor Andy Beshear is also attached that describes insurance coverage provided to healthcare professionals volunteering in this effort.
